FOREIGN DOCUMENTS BRANCH

Monthly Progress Report

September 1947

Section I

Implementation of Recently Proposed Plans and Policies

I.

b. Foreign Documents Branch

(1) Processing of Periodicals

(a) Of a total of eight issues of Foreign Documents Branch Periodical Abstracts prepared for publication during the month only one issue was disseminated due to the acute shortage of clerical personnel in Editorial Section.

(2) Discontinuance of Foreign Documents Branch Accession Lists

Pursuant to a memorandum dated 9 September, 1947, from the Assistant Director, OGD, publication of Accession Lists of oriental documents (except those having a "special or current interest") was discontinued effective 9 September, 1947.

Section II

Accomplishment of Overall Mission

II.

b.

(1) Production

Although production of Foreign Documents Branch publications has been maintained on a level with previous months, production facilities, specifically clerical and drafting personnel, have decreased, especially due to the loss of military personnel. The flow of Translated material ready for reproduction has continued to increase the already heavy backlog.

~~SECRET~~D. DOCUMENT SOURCE SURVEY DIVISION

This division has been operating with only one person assigned. Nevertheless in addition to all the basic planning and administrative steps accomplished, there are the following results to report in this field:

- a. Informal agreement between the Reference Center, ORE, and Foreign Documents Branch, OO, on the responsibilities and coordination of the survey components of the two Branches.
- b. The uncovering in Library of Congress storage a portion of the Rosenberg Collection. The division took immediate steps to have the collection held intact. Inasmuch as the collection had been forwarded there directly by the AGO the division made an informal agreement with the German Military Document Section, AGO, and with the Library of Congress for the retention intact by the Library of Congress of 1200 crates of captured German documents including the aforementioned portion of the Rosenberg Collection. Further, the division requested the Librarian, GMDS, to provide complete details as to receipt, shipment, and whatever details are available from screening accomplished by GMDS. This information has not yet been forwarded.
- c. The division now has on file location of fifteen additional repositories of captured German documents under Army jurisdiction. Steps are being taken to contact all of these repositories to determine extent of exploitation.
- d. Captured German naval records including intelligence on the USSR has been transferred to the Office of Naval Intelligence. ONI has agreed to let Foreign Documents Branch screen and exploit these documents, which will remain in the custody of ONI.
- e. Arrangements have been initiated to obtain on loan from Columbia University Libraries further current periodicals unavailable in Washington.
- f. Division is investigating the contents of 200 crates of non-technical captured German documents recently forwarded to GMDS, AGO, from Air Materiel Command, Wright Field. The division is seeking to determine the extent of exploitation of the documents by Air Materiel Command.
